

DIGAMBAR RAJARAM

DevOps & Infrastructure Engineer

Phone: +91-7353570952 | Email: digambarrajaram2@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Results-driven DevOps & Infrastructure Engineer with 2+ years of enterprise production experience at Protean eGov Technologies — one of India's largest government fintech platforms. Managed 1500+ VMs across 100+ ESXi hosts with 99.9%+ uptime, led a 6-member infra team, and administered a 10+ PB Commvault backup environment. Currently deepening cloud-native skills with hands-on AWS, Terraform, Kubernetes, and CI/CD pipeline projects. Actively seeking a DevOps or Infrastructure Engineer role to combine enterprise-scale operational discipline with modern cloud automation.

TECHNICAL SKILLS

Cloud & DevOps: AWS (EC2, S3, IAM, VPC, Lambda, API Gateway, EKS, CloudWatch, ALB/NLB), Terraform (Infrastructure as Code), Jenkins, GitHub Actions, Docker, Kubernetes, Ansible.

Infrastructure & Virtualization: VMware vSphere, ESXi, vCenter, HA/DRS, vMotion, vRealize Operations (vROps), Capacity Planning & Performance Optimization.

Operating Systems: Windows Server 2016/2019/2022, Linux (Ubuntu, Amazon Linux, Redhat Linux), OS Hardening & Patch Management.

Backup & Disaster Recovery: Commvault (10+ PB Enterprise Backup Infrastructure), Disaster Recovery Automation, RPO/RTO Validation.

Monitoring & Scripting: Amazon CloudWatch, Prometheus, Grafana, Python, Shell Scripting.

PROFESSIONAL EXPERIENCE

Assistant Manager – Infrastructure & DevOps | Protean eGov Technologies Ltd, Mumbai, Maharashtra, India. Mar 2023 – Jun 2025

Protean eGov (formerly NSDL e-Governance) operates India's largest government financial platforms including NPS, PAN, and TIN services — processing millions of transactions daily.

Enterprise Infrastructure & Virtualization

- **Maintained 99.9%+ uptime** across 1500+ VMs spanning production and DR environments on a clustered VMware vSphere architecture (100+ ESXi hosts), directly supporting mission-critical government financial services.
- **Reduced unplanned downtime by ~40%** through proactive performance monitoring using vROps analytics — tracking CPU Ready, memory contention, and storage latency across the entire fleet.
- **Executed zero-downtime ESXi lifecycle upgrades** and firmware validation cycles across 100+ hosts, coordinating with CAB and maintaining patch compliance with no production impact.
- Ensured workload availability via HA/DRS policies and live vMotion migrations during maintenance windows and hardware refresh cycles.

Windows & Linux Administration

- Managed full provisioning, patching, and security hardening lifecycle for 1500+ Windows Server (2016/2019/2022) and Linux VMs supporting enterprise application workloads.
- **Executed structured monthly patch cycles** across the entire VM fleet with minimal service disruption, maintaining 100% patch compliance for audit requirements.

Backup, DR & Automation

- **Administered 10+ PB enterprise backup environment using Commvault** — the backbone of disaster recovery for one of India's largest government fintech platforms.
- **Automated Disaster Recovery failover using Ansible**, reducing manual DR drill time by 60% and achieving consistent RPO/RTO targets during quarterly audits.

- Conducted restore validation during compliance audits and DR drills, maintaining zero data loss incidents throughout tenure.

Leadership & Governance

- **Promoted to Assistant Manager (Sep 2023)** — within 6 months of joining — based on demonstrated operational ownership and team leadership.
- Led daily operations of a 6-member infrastructure team; served as escalation point for P1/P2 incidents and conducted structured Root Cause Analysis (RCA) for all major events.
- Participated in CAB meetings and enforced ITIL-aligned change management processes, reducing change-related incidents by standardizing pre-change checklists.

Internal Infrastructure Automation – Inventory Management Platform

- Built an internal infrastructure asset management platform using Spring Boot, MySQL, and ReactJS to replace manual spreadsheet tracking of 1500+ hardware/software assets.
- Reduced audit preparation time by ~50% — platform provided real-time inventory visibility that was previously unavailable during compliance reviews.

DEVOPS & CLOUD PROJECTS

Enterprise DevOps CI/CD Pipeline – Jenkins, Maven, Docker & Ansible

- Designed and implemented enterprise-grade **CI/CD pipeline** for Java web application.
- Integrated **GitHub → Jenkins pipeline automation** for build triggers.
- Configured **Maven build lifecycle (compile, test, package WAR)**.
- Built optimized Docker images using **multi-stage builds**.
- Automated deployment using **Ansible playbooks**.
- Provisioned CI/CD infrastructure on **AWS EC2 instances** and implemented rollback strategy.

AI-Driven DevOps Incident Management Platform (AWS)

- Built production-style AWS infrastructure using **Terraform (Infrastructure as Code)**.
- Designed and implemented simulated **DevOps Agent workflow** to evaluate CloudWatch logs, metrics, and deployment telemetry.
- Correlated infrastructure state and CI/CD deployment history for automated incident assessment.
- Implemented **GitHub Actions CI/CD with secure OIDC authentication**.
- Performed failure injection testing to validate incident detection and response behaviour.

Multi-AZ AWS Networking & Auto Scaling Architecture

- Provisioned **multi-AZ VPC architecture** using Terraform.
- Implemented **ALB, Auto Scaling Groups, NAT Gateways**.
- Configured remote backend using **S3 + DynamoDB state locking**.
- Enforced **IMDSv2, KMS encryption, and least-privilege IAM practices**.

Amazon EKS Production Automation

- Provisioned **EKS cluster with managed node groups** using Terraform.
- Implemented **IRSA with OIDC for pod-level IAM access control**.
- Integrated **AWS Load Balancer Controller** for scalable deployments.

TRAINING & UPSKILLING

- Cloud & DevOps Upskilling Program – **Learnbay (Microsoft Collaboration, 2025)**
- AI Engineer MLOps Track – Deploy GenAI & Agentic AI at Scale (Udemy)
- VMware vSphere ESXi & vCenter Administration (Udemy)
- Java Full Stack Development – TalentSprint / Q-J Spiders

EDUCATION

Bachelor of Engineering (BE) - Computer Science and Engineering

VSM's S.R. Kothiwale Institute of Technology, Nipani, Belagavi | **Sep 2018 – Jul 2022**
